# THROUGH THE TRANSIT

With DOC and PETE

Professor Montz, demonstrating field equipment, sent one of the C. E. rookies to the supply room for a stake. After a considerable lapse of time, the student returned reporting, no meat in the basement.

"M. E." Jenkins had a short thesis to write and going through his fraternity file found one on the subject graded 75%. He copied it, placed his name at the top, and turned it in. The following day it was returned with a grade of 100% and this note on the bottom:

"I gave you 100% on this because I thought it was worth that when I wrote it."

If all the students who slept in class were placed end to end they would be much more comfortable.

Drink and the world drinks with you; swear off and you drink alone.

Wouldn't it be wonderful if every person who says he has a kick coming, would get it?

Some freshmen thought that back slapping ended with rush week, but now they know it doesn't. It just moves further down.

Professor Rowntree, who makes economists of the engineers, asking for criticism of his course, on the last day of the year, received this one:

Your course is okay but we can't see why you seat all the girls in the first two rows. Give us a break and spread them around the room.

That wise freshman who, the other day, refused to go after a thistle tube, must still have in mind his hunt for a left-handed tennis racket.

Sommerschield's trip to Scotland will not be forgotten as long as that genuine plaid tie of his and his Scotch accent are in evidence.

We were tickled at the freshman who was wondering how a drafting room worked with all the windows closed.

Professor Greene of Physics, after throwing the fourth piece of chalk in an attempt to awaken Mark Fleming, put the class in an uproar with, "Save 'em up and I'll give you a whole stick when you get ten."

"Doc" Lehoczy has been patiently trying to show his quantitative class the importance of a log-log slide rule. Those boys just can't fathom the significance of a rule for sliding logs.

Prof. Morrison's class cannot figure out why feeding a drill has anything to do with boring holes.

Glancing through the files the other day, we had to look twice to see if Rodeheffer was a student's name or an intramural sport.

Lieut. (inspecting mess hall): "What's the menu?"

Mess Sergeant: "We have a thousand things to eat, sir."

Lieut.: "What are they?"

Mess Sergeant: "Beans."

First Customer: "Never mind asking anyone. Just put a Cuba sugar in our Java."

Waitress: "Sweden it yourself, I'm only here to Servia."

Second Customer: "Denmark our bill and call the Bosphorus. He'll probably Kenya. I don't Bolivia know who I am."

Waitress: "No, I don't Caribbean. You fellows sure Armenia."

Boss: "Samoa your wisecracks, is it? What's got India? You think maybe this argument Alps business?"

Both Customers: "Canada noise. Spain in de neck."

Voice (over telephone): "Are you the game warden?"

Game Warden: "Yes, ma'am."

Voice: "Well, I am so thankful I have the right person at last. Would you mind suggesting some games suitable for a children's party?"

Since Bone switched to Kore's brand of tobacco, they are pals again.

Driving through the campus late last night Mr. Shortley of the Physics Dept. was seen coming out of Orton Hall; probably after a long hunt for an atom; oh me.

Stern Father (to son leaving for college): "Now don't let me hear any bad reports about you."

Son: "I'll try not, Dad, but you know how those things leak out."—*Rose Technic.*

A college magazine is a great invention.

The college gets all the fame,

The printer gets all the money,

And the staff gets all the blame.—*Lehigh Burr.*

If a Beta meet a Beta

With a Gamma Phi

And a Beta has no data

Needa Kappa Psi?

Every Beta has a data

"Why," you say, "don't I?"

See you, lata, I've no data

I'm a Hunka Pi.

—*Auburn Engineer.*

Now, as the "Chief" would say, "Well, boys, what do you say we call it a day?"

THOUGH large, the Bell System is simple in structure. You can think of it as a tree.

**Branches:** 24 associated operating companies, each of them attuned to the area it serves.

**Trunk:** The American Telephone and Telegraph Company, which coordinates all system activities.

**Roots:** Bell Telephone Laboratories and Western Electric, whose functions are scientific research and manufacture; Long Lines Department of A. T. and T., which through its country-wide network of wires links together the 24 operating companies, handles overseas service; Advisory Staff of A. T. and T., which advises the operating companies on all phases of telephone operation and searches constantly for better methods.

Working as one, these many Bell System units enable you to talk to almost anyone, anywhere, any time.

Why not call your folks tonight? For lowest rates, call by number after 7 P. M.
